Creating Possibilities

AutoTurn soft swivel cushion

The Etac AutoTurn facilitates getting in and out of a car. The low friction allows the user to slide and turn into the desired position in the car seat. This minimizes strain and twisting of feet, knees, hip and back. Auto-Turn is fixed around the car seat with a belt and buckle. Handles at the sides can be used to assist the user into place, and small straps at the side can be attached around the seat belt, firstly as a location aid and then secondly as additional security.

Intended Use

- In and out of a car
- In and out of bed
